Highlights

imagen technology
imagen is exclusive Philips photo enhancement technology that automatically analyses your photos to correct colour and adjust for optimal contrast: imagen separates colours to avoid "crosstalk", adjusts brightness distribution for great visual contrast and corrects Gamma for colour accuracy.

RadiantColor
RadiantColor is an exclusive Philips technology for displaying smaller photos in the optimal 4:3 ratio by extending the colour on the edges of a less-than-full-screen photo to the sides of the screen, eliminating black bars and aspect ratio distortion.

SmartContrast

SmartContrast is Philips technology that analyses the contents you are displaying, automatically adjusting colours and controlling backlight intensity to dynamically enhance contrast for the best digital images and optimum contrast for better entertainment when viewing videos or playing games where dark hues are displayed; when you select the Economy mode, contrast is adjusted and backlighting fine-tuned for just-right display of everyday office applications and lower power consumption.

Multiple-photo collage effect
It's a slideshow effect to show photos in collage form, which automatically and randomly compiles different photos together, eliminating unattractive borders that may result from photos that are smaller than the screen size.

Viewing photos in USB flash
A USB connector for easy viewing and sharing of photos stored on a USB flash drive.

SmartPower
A timer turns PhotoFrame on and off at the times you choose, reducing energy consumption for the sake of our environment and saving up to one third of your PhotoFrame energy costs.
